Detailed Action

This is the first Office Action corresponding to original filing.

Information Disclosure Statement

Receipt is acknowledged of Information Disclosure Statement which, has been reviewed by the Examiner.

Drawings

The drawings have been accepted by the examiner.

Specification

The "brief description of the drawings" does not complain with Office's regulation, see MPEP § 608.01(f). Must include a reference to and brief description of the drawing(s) as set forth in 37 CFR 1.74.

The use of the trademark VELCRO has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

The disclosure is objected to because of the following informalities: on page 8, line 7 "to cover" should be - - to cover - -; and in line 15 "it's" should be - - it is - -.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 4, 5, 11, 12, 14, and 15 are rejected under 35 U.S.C. 102(e) as being anticipated by Myers (Pat. No. 6,363,661).

The patent to Myers shows a flexible cover to protect items from weather elements comprising a sheet and anchors 20 to be filled with a weight as water to anchor the cover.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 6-10, 13 and 16-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Myers. The material from which the anchor elements (20) are made from is not disclosed by the patent. However, to make them of the same material as that of the cover is considered to be an obvious matter of engineering choice with no patentable significance. As to claims 6 and 20, the location of the anchors is also considered to be an obvious matter of engineering choice or expediency again having no patentable significance.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Graves (3,862,876), Curle (4,455,790), Runge (4,122,637) and British patent No. 2,206,024 show other examples of cover means.
